PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in data analysis, SQL-based analytics, ETL pipeline development, and interactive dashboard development using Power BI and Advanced Excel. Experienced in data cleansing, data quality checks, and data annotation on large-scale NLP datasets, plus applied machine learning (regression, classification, clustering) through independent projects, including an end-to-end pipeline processing 500K+ records for customer churn prediction. Skilled at interpreting complex datasets, identifying trends and patterns, and translating findings into clear reports and stakeholder-ready dashboards. Strong communicator experienced collaborating with cross-functional and ML teams to support business intelligence initiatives.

EDUCATION

Indian Institute of Technology, Jodhpur, *B.Tech in Artificial Intelligence and Data Science*

Dec 2025

Course: Probability Statistics and Stochastic Process | Data Visualization | Statistical Inference and Simulation Techniques | Complex Analysis | Introduction to Financial Engineering | Mathematics for Economics | Data Structures and Algorithms | Pattern Recognition and Machine Learning | Data Engineering | Deep Learning

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL(Joins, Subqueries, Views)
Data Analytics	Trend/Pattern identification, Statistical inference, Data interpretation
Data Visualization	Power BI (Dashboards, KPIs, Reports), Advanced Excel (Pivot Tables, Charts, Vlookup)
Databases & Data Systems	MySQL (schema design, query optimization)
Machine Learning	Regression, Classification, Clustering (KMeans), Model Evaluation
Data Quality & Management	Data cleansing, data normalization, data validation, data quality checks
Data Annotation	NLP model output annotation, error categorization, benchmark comparison
Business Intelligence & Reporting	Cross-functional collaboration, stakeholder reporting, report writing

PROFESSIONAL EXPERIENCE

NLP Data Analyst & Annotator, Prodigal Tech

Sep 2025 - Present

- Analyzed AI-generated NLP output against human benchmarks to identify, categorize, and annotate model errors, improving reporting accuracy for ML teams
- Conducted weekly error pattern analysis across multiple client datasets, quantifying error rates and delivering structured reports with graphs, tables, and charts
- Built and maintained data reporting pipelines and visualizations communicating AI performance trends to management to support model optimization decisions
- Collaborated cross-functionally with ML engineers, translating data findings into actionable insights that informed NLP model retraining strategies
- Supported data quality initiatives, ensuring data cleansing and normalization of annotated datasets across multiple clients

Research Intern - k-Path Partition Graph Algorithm, IIT Indore

May 2025 - Jun 2025

- Designed and optimized dynamic programming algorithms, achieving a 20% performance improvement over baseline through algorithm redesign, parallelization, and memory optimization
- Applied optimized algorithms to real-world datasets in protein networks, robotics, and transit planning, demonstrating data-driven problem solving at scale

PROJECTS

Customer Retention & Churn Prediction | GitHub | Dashboard

Jun 2025 - Jul 2025

- Built an end-to-end ETL pipeline using SQL and Python to clean, transform, and load 500K+ records for churn prediction modeling
- Segmented customers using RFM analysis and KMeans clustering; developed interactive Power BI dashboards visualizing churn risk, customer behavior trends, and KPIs
- Identified data patterns and delivered targeted recommendations to optimize retention, translating analysis into business process improvements

Ola Data Analytics Project - BI Dashboard | GitHub | Dashboard

May 2025 - Jun 2025

- Analyzed 100K+ booking records to extract business intelligence; designed SQL views and calculated KPIs covering ride metrics, customer ratings, and cancellation patterns
- Built Power BI dashboards highlighting peak demand periods and high-value customer segments, enabling data-backed operational decisions

CERTIFICATES

Career Essentials in Data Analysis | Microsoft & LinkedIn | Certificate

Jul 2025

- Gained hands-on experience in Excel, Power BI, SQL for data analysis and visualization.
- Learned best practices for cleaning, transforming, and analyzing datasets.

RESEARCH PAPER

Exact and Parameterized Algorithms for Window Minimization in Bipartite Arrangement

Jun 2024 - Nov 2024

| CIAC, 2025 | Rome, Italy | Springer Publishers
